Vendor Sessions

Transact – Colin Whitehead

Yes, We Can Take That Payment - A Strategic Approach to Accepting One-time Payments

Learn how Higher Education institutions are adapting PCI compliant payment solutions to take one-off transactions and meet the needs of high AND low volume department merchants, invoice payments, and cash advance returns. All institutions are looking to increase efficiencies for departments as well as students while streamlining the reconciliation process without expanding additional bank merchant accounts or increasing PCI scope.

Instructure – Michael Yakubov

Building a Lifelong Learning Strategy for Higher Education: An Insider's Guide to Leveraging LMS Technology to Address Non-traditional Learning.

The rapidly changing markets for adult and non-traditional learners continues to be a moving target for institutions of higher education. Given the emergence of AI, growing market competition, and the shifting paradigms in educational degree value, we explore how institutions are building sustainable roadmaps for success. This includes awareness and attention to workforce development, continuing education, corporate partnerships, hybrid learning, and other strategy focused initiatives. During the presentation, we will do a deep dive into strategic plans, align digital resources, and share insights from the field.

Voyatek – John VanWeeren

AI-powered Analytics and Fraud Detection

We will showcase how Voyatek's AI-enabled SSA Cloud analytics platform puts actionable information and fraud detection at your fingertips. Our platform offers a modular, comprehensive view of the student lifecycle, with AI models trained on and tailored to your unique environment.

Our sophisticated application fraud firewall empowers institutions to proactively detect and monitor fraudulent applications, significantly reducing the risk and disruption of ever-evolving fraud schemes. SSA Cloud's additional AI capabilities analyze student engagement, forecast course demand, and predict retention and completion rates, providing critical insights via dashboards that streamline operations and reduce manual work.

2024 NJ Regional Users Group Session Descriptions

Join us to explore how SSA Cloud can help your institution reduce manual processes, prevent application fraud, and enhance student success. Learn from our client outcomes, including substantial financial and time savings, and discover why we are the trusted analytics partner for clients and system providers alike.

SoftDocs – Lori Halligan

How Institutions Manage Documents, Data and Processes with Ethos and Softdocs

Ellucian sits at the center of -your campus operations. As a trusted core system built for integrations, it's imperative to further modernize your institution and expedite departmental processes that improve the student experience and decision-making. Join this session to learn how Softdocs, through its robust integration with Ellucian Ethos, is being leveraged at peer institutions to improve operational efficiencies and automate key processes.

Aptron – Dianne Ackerman

Easy Reporting with mvQuery

Empower your end-users and IT personnel with an easy-to-use query, report designer and data export tool specifically designed for multi-value databases like Ellucian Colleague. mvQuery uses your existing familiar dictionary items with little setup needed and is available as a subscription. Come see how easy it is to get started.

ACI Worldwide – Jim Curry

A Generational Change in Payment Habits – How to meet Students (and Parents) where they are

Learn about the quick-changing landscape of the payment industry and the habits of your students and parents. If your institution isn't looking at how students want to interact (payment wise) with the University, now is the time to prepare yourself for what students and parents expect Universities to provide and future-proof your tuition billing and payment operations. Join us to learn what the changes in the industry look like and what questions to ask to ensure you're meeting the student and parents where they are.

With over 35+ years of experience in Student Services and the Payment Industry, James Curry will provide an engaging overview of the dramatic changes, what to expect, and how to prepare yourself for the inevitable change.

Atlantic Cape Community College

Self-Service Procurement Implementation: Where Do We Begin?

We recently set up Self-Service Procurement and Budget Monitoring. Hear how we took this daunting task and broke it down into pieces to simplify implementation. Learn how to set up self-service requisitions, approval routing, and a flow that works for your institution.

Robyn Berenato

Atlantic Cape Community College

Removing Barriers to Student Degree Conferral

Come find out how Atlantic Cape leveraged the use of Colleague and Informer to "auto-audit" and "auto-grad" its students to make sure their completion is not hindered by red-tape. Students are gathered based on number of college-level credit completion and then moved to a list worked by the Enrollment office for their active degree program to be audited. This process aids in retention as well as assisting students toward timely completion.
